

Abdullah Sahapdeen

Full-Stack Software Engineer | TypeScript, React, Node.js, AWS

asahapde@gmail.com | asahap.com | linkedin.com/in/abdullah-sahapdeen | github.com/asahapde

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Java, Python, C#, SQL, HTML, CSS/SCSS

Frontend/Backend: React, Next.js, Node.js, GraphQL, Angular, Spring Boot, Micronaut, ASP.NET Core, REST APIs

Cloud/Data/Security: AWS (Lambda, SQS, SNS, DynamoDB, CloudWatch), PostgreSQL, MongoDB, Auth0, JWT, RBAC

Testing/DevOps/AI: Playwright, Jest, Docker, Git, GitLab CI/CD, Jenkins, AI Agents, Prompt Engineering

EXPERIENCE

TD

Aug 2026 – Present

Software Engineer II

Toronto, ON

- Built stage-specific **AI agents and skills** on a shared **TypeScript + Playwright** framework to automate Tosca migration: blind conversion, intent verification, and consolidation of repeated logic into shared helpers.
- Optimized an **AI orchestrator agent** (validation, retry, and locator-fix flows), re-engineering its prompting to raise fix success rate from **27% to 86%** (6/22 → 19/22) on a validation set; teammates reported similar gains.
- Built a **PR review agent** that automates **code review** of generated Playwright changes against framework standards for assertions, locators, and maintainability.
- Migrated **400+** tests from legacy **Tosca** to code-based **Playwright** on a large enterprise application (about **1,400 tests**), partnering with the application team to fix broken tests and documenting recurring blockers for the team.

CARFAX

May 2023 – Aug 2026

Associate Software Engineer

London, ON

- Developed full-stack features using **TypeScript, React, Node.js, GraphQL, REST APIs, and AWS** for a dealer platform serving approximately **200,000 monthly active users** across North America.
- Built responsive customer-facing features across desktop, tablet, and mobile, including a Notification Center and a homepage lead-generation banner that increased submissions by over **200%**.
- Built a custom **useFeatureFlag** hook using Contentful for dealer-by-dealer feature rollouts, and improved **accessibility** (ARIA, keyboard navigation, WCAG 2.1 AA).
- Refactored **15+ React components** from class components and MobX stores to hooks and Context, adding lazy loading and modularization to reduce initial page load time by approximately **35%**.
- Expanded automated **unit and component testing** using **Jest** and **React Testing Library**, increasing coverage from approximately **60% to over 90%** and contributing to a roughly **40% reduction in frontend production defects**.
- Implemented authentication changes during a migration from **AWS Cognito to Auth0**, updating API endpoints and frontend workflows for **token-based authentication and role-based access control (RBAC)**.
- Built an automated **Auth0 token rotation system** using **AWS Lambda, Secrets Manager, and SNS** with PagerDuty alerting, preventing authentication failures caused by expired tokens.
- Developed a **Java** ad-configuration service using **Micronaut, AWS Lambda, and Google Ad Manager**, with an asynchronous **SQS** pipeline for burst traffic and automated bulk upload of about 4,000 items from CSV.
- Built features on **DynamoDB**, migrated to AWS SDK v3, and added **CloudWatch** metrics, logs, and alerts.
- Built reusable **AI agent skills and developer automation** for code migrations and repetitive engineering workflows, reducing manual effort; collaborated through code reviews, pair programming, and **Agile** delivery.

Ontario Teachers' Pension Plan

May 2021 – Sept 2022

Software Developer Intern

Toronto, ON

- Built internal reporting dashboards with **Angular and TypeScript** and migrated **10+ AngularJS** pages to Angular 11.
- Developed backend logic and data-model changes in **C#, .NET, and ASP.NET Core**, with unit tests.
- Coordinated weekly releases with **CI/CD** tooling (Jenkins, CloudBees, SonarQube, UrbanCode Deploy) and automated deployment packaging with PowerShell and Git.

PROJECTS

TaleForge | Next.js, Spring Boot, PostgreSQL, Docker, Vercel, Fly.io

- Built and deployed a full-stack branching storytelling platform with **Next.js, Spring Boot, and PostgreSQL**, implementing **REST APIs, JWT authentication** with role-based permissions, and story approval workflows.

ScreenAI | Next.js, TypeScript, Groq Llama, AI Agents

- Built an **LLM-powered recruiting platform** that orchestrates **AI agent workflows** to parse resumes, cross-check candidates against GitHub and LinkedIn evidence, and produce skill assessments with supporting evidence and red flags.

EDUCATION

Western University

Sept 2018 – Apr 2023

Bachelor of Engineering Science in Software Engineering

GPA: 3.9 / 4.0, Dean's List

CERTIFICATIONS

AWS Certified Cloud Practitioner

Issued Oct 2025 – Expires Oct 2028
